

## 2015 PSP and CPP Certification Reviews

The time has arrived once again to encourage our membership to advance their careers and enhance the protection of their organizations by pursuing professional certification. The Houston Chapter of ASIS International is proud to announce another set of review sessions for the CPP and PSP certifications. Facilitated by the Chapter's Certification Chair, David Cribbs, CPP, PSP. The sessions will focus first on the PSP curricula, and then will concentrate on the CPP domains.

The PSP review will begin on July 2, 2015 and continue each Thursday evening through August 6, 2015. CPP review will begin on August 13, 2015 and will continue each Thursday evening through October 22, 2015. Each review session will run from 6:00PM to 9:00PM, although some may run shorter based on domain content. All sessions will be hosted by the University of Texas Police Department at MD Anderson's South Campus Research Building (SCRB) #2 located at 7455 Fannin St, Houston, TX 77054. Parking accommodations have been arranged at the location, and a map is attached on next page.

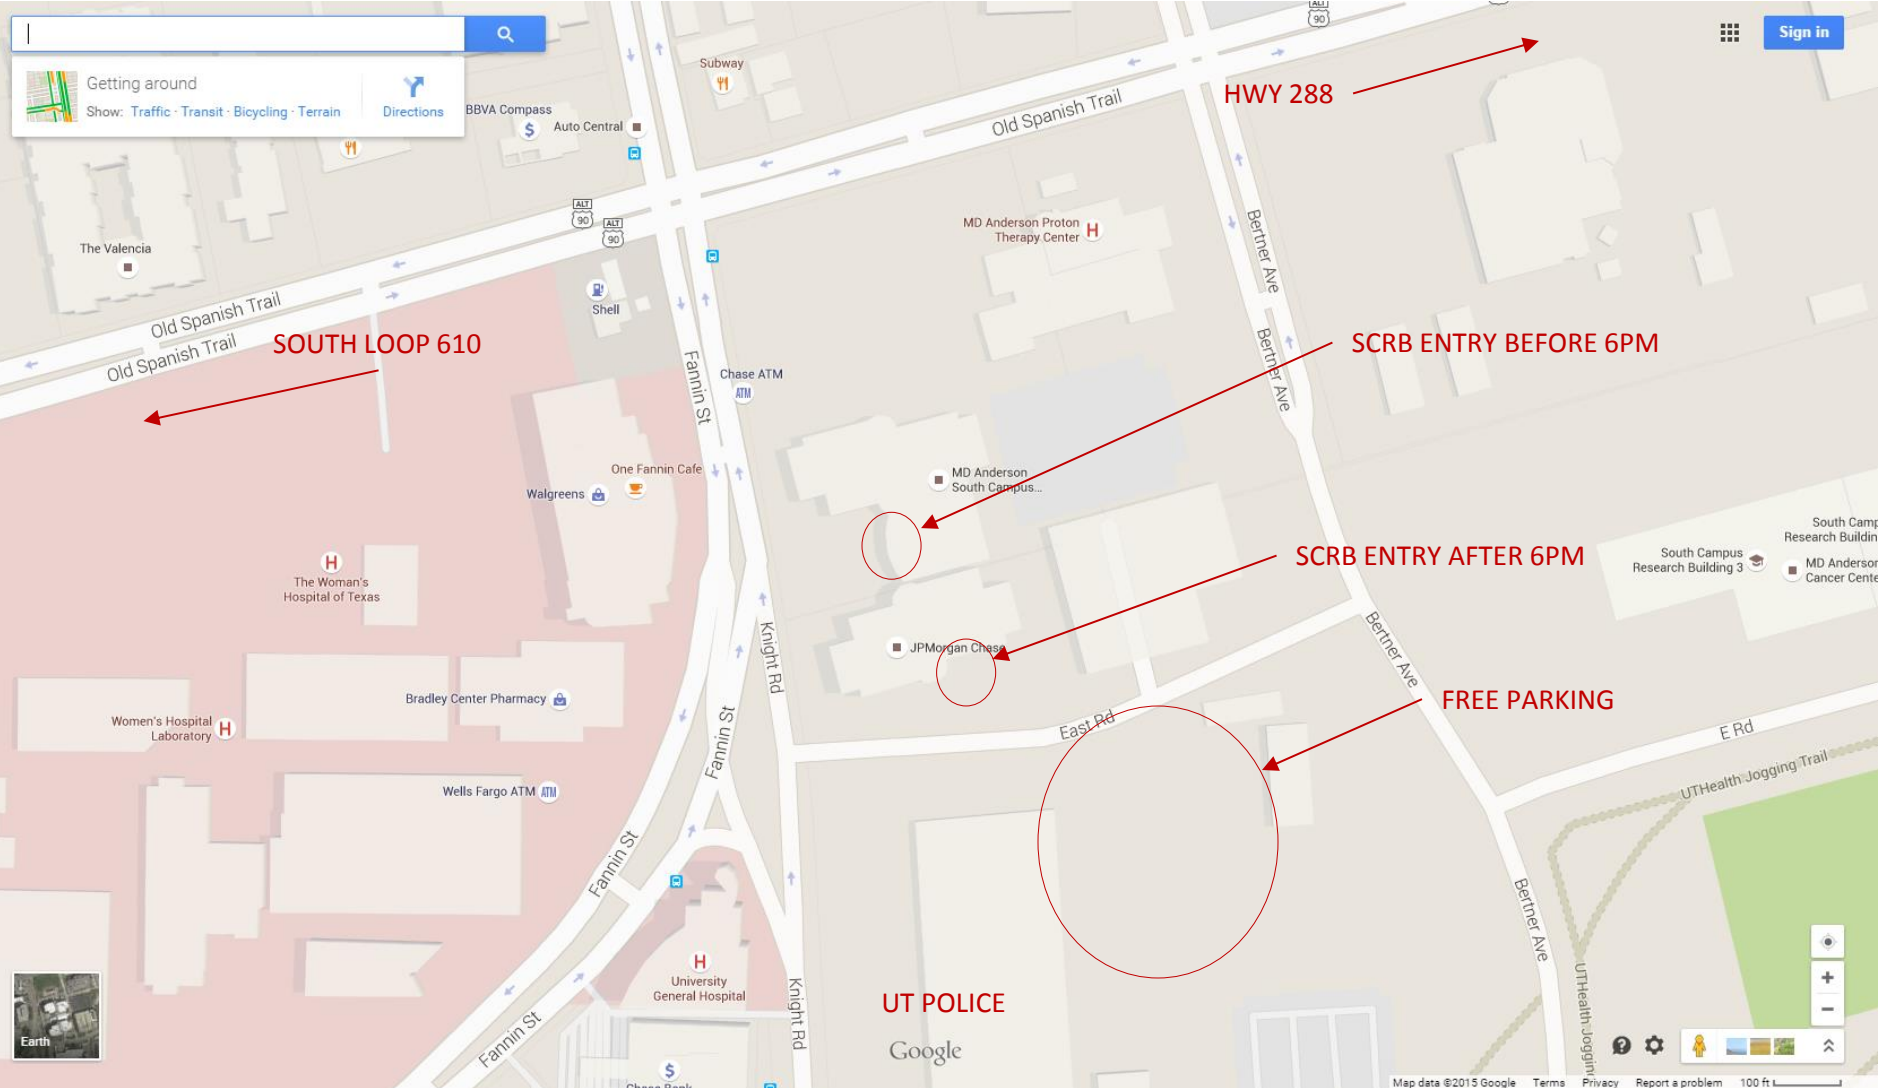

The Chapter understands the schedule demands we all face, and the commitment to become certified is no easy effort; attendees are welcome to attend all sessions or just the sessions for which they wish to focus their study efforts, and they may come and go as necessary at each session. Ultimately, the benefit each member derives from the series is dependent on the time and effort each can devote to the review process, so we hope to see our members make the most of this opportunity!

Please RSVP to David at [dpcribbs@gmail.com](mailto:dpcribbs@gmail.com). It is only necessary to register for the series; it is not necessary to identify which track or sessions will be attended. As always, cost for the sessions is free to ASIS Houston Chapter membership. Please note that handouts will not be provided. Study material will be distributed to registered attendees via email prior to each session. Attendees are encouraged to print and bring these materials, or bring a laptop or tablet to work from; no other materials are required.

7/2/2015 Thu	6:00 PM – 9:00 PM	PSP, Domain 1, Physical Security Assessment (Risk Mgmt.)
